## TO THE GROWER

---

In making out our 1933 list we take pleasure in announcing five new varieties of sweet peas which we believe have no equal. We test our sweet peas under glass and out-doors and we know that when we release them to the growers that they will meet every demand. Many growers in different parts of the U. S. test our new varieties under number each season and we receive reports from most of the growers who try them. If any report is unfavorable we do not release such varieties to the trade.

During the past few years we have released many new varieties of the double or duplex type of Early Flowering sweet peas and we have seen several of these under glass and in all cases they were of a larger flower than the regular Spencer but in some instances the stem was shorter. We have marked those with long stem and you will be safe in choosing these for your needs. You should try these for your trade and we are sure you will not be disappointed. We have the most complete line of Duplex sweet peas on the market today in Early Flowering. We recommend Zvol. Sonny Boy, Zvol. Duplex Sunset, Zvol. Duplex Pale Blue, Zvol. Duplex Blue, Zvol. Duplex Salmon Pink, Zvol. Duplex Baronet and Zvol. Duplex White as the best in the Duplex type, with long stems. The others are of very large size but the stem is not as long. Our prices are with the times and are within reach of all growers and you are assured of the best quality of seeds obtainable. Satisfaction is guaranteed or we will replace any variety free of charge. If you get results with our Early Flowering sweet pea seed let us know. Here are a few of the hundreds of testimonials from satisfied growers.

## CULTURE SUGGESTIONS

Work soil at least 18 inches deep; use liberal amount of Well decayed manure. Cow manure is best. Use sprinkling of lime and bone; Soak seed in water for about 24 hours or until swelled up and then plant about 1½ to 2 inches deep in a well firmed soil that is good and moist, but not sticky. (DO NOT SOAK WHITE SEEDED VARIETIES).

Peas will not do well in too loose a soil. Plant one inch apart and later thin to about six inches. Do not water until seeds have begun to germinate. After germination has taken place give a good soaking. MOST FAILURES ARE CAUSED BY WATERING BEFORE SEED HAS SPROUTED. If weather is hot use some kind of shading. Protect young plants from birds outdoors. Look for Green Aphids regularly as this insect is the worst enemy. Spraying with nicotine, one part nicotine to 400 parts water with spray gun is best. There are also many other good insecticides which are excellent for the control of Aphids. Give young plants substantial supports in order that they may climb and produce good flowers. Poor flowers with crooked stems are worthless. Liquid manure feeding after they come in bloom will lengthen the flowering period and produce better flowers. Pick all flowers daily as this also lengthens the flowering period. Always keep the surface earth loose and never allow a crust to form. If grown indoors keep ventilators open to keep the air as dry as possible. A house that is kept damp and sultry will cause too much growth and the sweet peas will not bloom as soon as they should, and then will begin to bloom too high up. Early sweet peas usually bloom from 75 to 100 days after seed is planted. Leading commercial colors are in order named: Pink, Lavender, White, Salmon, Orange, Blue, Red. Other colors should be used in lesser quantities. One ounce of Sweet Pea Seed will plant about 25 feet of row.

While these sweet peas are not as large as the Spencers, they are a distinctly new type as a photo on cover shows. They grow as tall as the Spencers, but foliage is somewhat heavier. Flowers measure as much as two inches across when well grown, with stems 14 to 16 inches long. Three to four flowers on a stem as a rule. Fragrance is much more pronounced than that of the Spencers. While not the best for commercial purposes, no collection is complete without this new distinct type. Colors in Rose Pink, Black-seeded and White-seeded White, Lavender and Lilac, and mixed colors.

PRICE ON EACH OZ. . . . . \$1.00
